

You can be killed or seriously injured if you don't follow these instructions

DANGER

TIP OVER HAZARD

IMPORTANT - THE BED MUST STAY SECURED TO THE WALL FOR STEPS 1 TO 5 - IMPORTANT

Step 1

Open the bed and remove the mattress

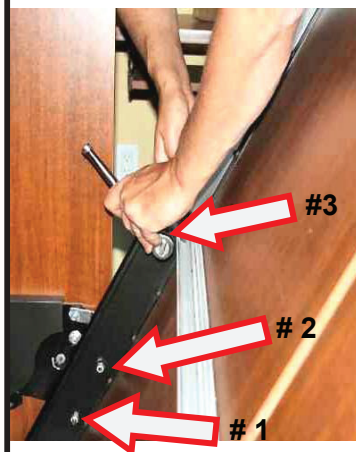

Have a 2nd person hold the front panel in place

Step 2

Ease the panel up and rotate the silver bracket over the top nut on the mechanism to prevent the door from closing.

Step 3

- Loosen the right bolt located in the #3 position.
- Remove the bolt in the #2 position.
- Repeat on the left side.

Step 4

Carefully tilt and slide the front panel upwards respecting the locked angle. This step requires 2 people.

The door is very heavy, do not put your feet under to support

Step 5

Sit on the ground and base your foot against the front edge of the side panel. Use a PVC tube and pull the arm towards you to free the silver blocking bracket. Ease the arm back slowly.

DANGER: Beware of the strong tension on the springs.

Step 6

Disassemble the bed casement.

First remove it from the wall by unscrewing the secured attachments.

Place the casement face down on the floor to disassemble.

Note:
Leave the mechanism on the side panels
